

BALI /WIND FLAG

Bali (or wind) flags have a different shape to the teardrop that allows for wind movement. They are popular for both outdoor and indoor eye-catching graphics. They can be used to replace existing flags, or purchased with new display hardware.

Sizes

Bali flags are available in 3 sizes that will suit most applications.

- Small: 2.5m high (2 x 0.6m graphics panel)
- Medium: 4.0m high (3 x 0.7m graphics panel)
- Large: 5.3m high (4 x 0.8m graphics panel)

Single and double sided

All bali flags are printed using a digital sublimation process that ensures rich and vibrant colour reproduction with a long life-span.

Single sided (mirrored) flags are printed to the flag textile with a direct sublimation process that produces a full image strike-through (95%+) mirror to the reverse.

Double sided flags are printed as 2 images using a transfer sublimation process, before being bonded together with a blackout sandwich in-between.

Display hardware and accessories

A wide range of display hardware and accessories are available to suit the Teardrop flags.

Other sizes and styles are also available to suit almost any application. No minimum order quantities and fast turn-around.

Bali / Wind flags

BALI-SML

Small bali flag, mirrored textile print.
Display area = 2.0 x 0.6m.

BALI-MED

Medium bali flag, mirrored textile print.
Display area = 3.0 x 0.7m.
