

FLAG ACCESSORIES

CROSS

The folding cross base suits all of the teardrop and bali flag range of displays. The spigot allows 360 degree rotation of the flag pole.

The water bag can be placed over the feet to provide extra weight to the base where wind is an issue.

The unit folds away when not used and can be packed back in its carry box and into the pole bag if required.

SPIKE

The spike base suits all of the teardrop and bali flag range of displays. The spike is pushed into the ground to provide a firm support when outdoors and the spigot allows 360 degree rotation of the flag pole.

The unit packs away when not used and can be packed into the pole bag if required.

FLAT

The flat base suits all of the teardrop and bali flag range of displays. It can be used both in and outdoors as required using either a water bag or pegs into the ground for support in windy conditions.

The spigot allows for 360 degree rotation of the flag pole.

WATER

The water bag can be fitted over either of the cross or flat bases and filled with approx 10L of water to provide extra weight for the flag display.

WALL-45

The wall-45 base suits all of the teardrop and bali flag range of displays. It holds the flag at a 45 degree angle, with the spigot allowing for 360 degree rotation of the flagpole.

WALL-90

The Wall-90 base suits all of the teardrop and bali flag range of displays. It holds the flag at a 90 degree angle, with the spigot allowing for 360 degree rotation of the flagpole.
